## **A new K-TEC 350 two-colour machine with monosandwich equipment for mould trials has arrived at the technical centre**

As of now it is again possible to carry out mould trials with monosandwich operation at our technical centre.

For this purpose we have a **K-TEC 350 2F MSW** with a vertical injection unit 493 (Ø 50 mm) and horizontal injection unit 1650 (Ø 60 mm) available.

Please send your enquiries using the attached checklist to our new head of the application technology department, Mr. Sven Engelmann (E-Mail: [sven\\_engelmann@ferromatik.com](mailto:sven_engelmann@ferromatik.com)).

Please contact the application technology team with any questions. We are looking forward to many interesting mould trials with you and your customers!
